**Operations Engineer  
Denver, Colorado**

Dalton Boggs & Associates is conducting a search for an Operations Engineer for the Denver office of an exploration and production company that acquires, develops, and trades petroleum and natural gas properties in the United States, Canada and Brazil.

This individual will join a dynamic exploration and production team and be responsible for providing technical support in evaluating and monitoring existing and future interests in oil and gas assets including providing reserve assessments, economic analyses and reservoir performance modeling, preparing written reports, making presentations, evaluation of acquisition candidates, and occasional travel to field locations

Qualifications include BS in Petroleum Engineering or BS in other type of engineering with petroleum related training while with a previous employer, 2+ years experience in petroleum engineering, exposure to Rockies gas and oil operations and evaluation, experience with drilling, workovers, fracs, facilities, and completions, and ability to run reserve evaluations.

All inquiries will be held in the strictest of confidence. An extremely competitive compensation, benefits, and relocation package is available. If you know of anyone who may want to receive some additional information about this exciting opportunity, please have them call, contact or submit a resume in confidence to:
