**Production & Completions Engineer, East Texas
Houston, TX**

Dalton Boggs & Associates is seeking a Production & Completions Engineer for the East Texas operations of a privately funded company headquartered in Houston, Texas, that engages in the acquisition, development and production of natural gas and crude oil properties. The company's focus and expertise include East Texas, South Texas, Lower and Upper Texas Gulf Coast, and the Rocky Mountain region.

The company owns more than 274,000 total net acres, proved resources of 190 Bcfe (85% gas) and probable reserves of more than 120 Bcfe. They have 300 operated wells and 300 non-operated wells in East Texas.

The Production & Completions Engineer will be responsible for well assessment, frac design, stimulation, workovers and recompletions, new well completions, artificial lift applications, and production optimizations.

Qualifications include a degree in Petroleum Engineering, 10+ years of experience in the oil and gas industry, hands-on completions and frac design experience, and vertical and horizontal experience. Experience in the design of workover and recompletion projects, and production facilities design and installation. Must have experience in East Texas including Bossier, Cotton Valley, and Travis Peak formations.

All inquiries will be held in the strictest of confidence. An extremely competitive compensation, benefits, and relocation package is available. If you know of anyone who may want to receive some additional information about this exciting opportunity, please have them call, contact or submit a resume in confidence to:
