

## **Senior Reservoir Engineer – Austin Chalk Houston, Texas**

One of the largest and most successful managers of oil and gas assets for institutional investors in the country is seeking a Senior Reservoir Engineer for its operations in the Austin Chalk. The company currently operates more than 18,000 wells in 12 states: Arkansas, Colorado, Kansas, Louisiana, Michigan, New Mexico, New York, Ohio, Oklahoma, Pennsylvania, Texas and West Virginia.

The primary role of this position is to maximize the cash flow of the company's largest producing asset by recommending infill drilling, recompletions, identifying reserve adds, and producing AFE evaluations. Will be in close coordination with the production department on the ongoing stimulation project. In addition, responsibilities include reserve reporting, budgeting and tracking well activity and production.

Qualifications include 10+ years of experience in the oil and gas industry, must have strong skills in Aries and Excel, experience in horizontal development preferred. Sound understanding of field operations, reserve reporting, proficient in Microsoft Office products, an ability to analyze technical data both public and internal sources (IHS/Enerdeq, Drilling Info, Texas Railroad Commission, etc).

All inquires will be held in the strictest of confidence. An extremely competitive compensation, benefits, and relocation package is available. If you know of anyone who may want to receive some additional information about this exciting opportunity, please have them call, contact or submit a resume in confidence to:
